

General Ledger – Misc

Combine Corporate Accounts

This step will combine all general ledger accounts by corporate entity.

Note: When the user has all company access and they're logged into company 1, the GLCOMB file will be cleared and entirely rebuilt. Otherwise, the GLCOMB records for the company that the user is currently logged into will be cleared and rebuilt.

The path from the drop down menu: GL > Misc > Combine Corporate Accounts

There is no input for this option. Selecting it from the drop down list will display a submit screen. (Figure 1)

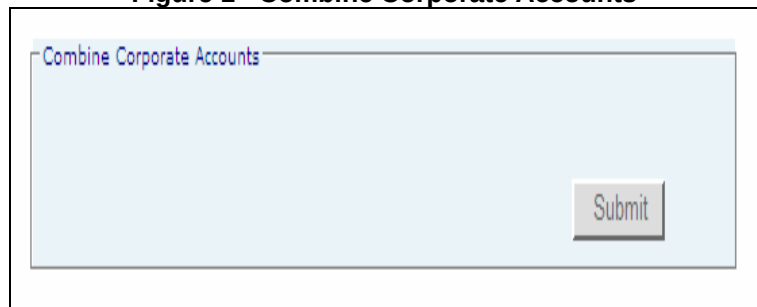

1. Click on  button to execute.

Figure 1 - Combine Corporate Accounts

2. If the  button was clicked, you will get a confirmation screen showing your process is complete. (Figure 2)

Click  Back to return to the initial screen.
