Field Definitions

1099 Information

Type of 1099 – If a year end form is required for this vendor, enter code representing the form. If no form is required, leave this field blank. 1099's are not normally required for US corporations (those having a federal ID #).

Blank = None

M = 1099MISC - US miscellaneous income

I = 1099INT - US interest income

R = 1099R - US rental income

T = T4A - Canada form

Vendor ID Type – If a tax ID number is entered, this field defines how the number should be printed. Your options are:

C = US Federal ID (xx-xxxxxxx)

I = US Social Security # (xxx-xx-xxxx) If 1099 Required

Tax ID Number – This number prints on year end tax forms such as 1099MISC.

Direct Deposit Information

Bank Code – If the vendor is paid through direct deposit, enter C for checking account or S for savings account. The code is used to send the proper information to the bank.

Account Number - The bank account number that corresponds with the direct deposit code. This number is used to send the proper information to the bank.

Routing Number - This is a nine digit number that corresponds to the bank account number.

General Information

Workers Comp Required – A "Y" designates that a worker's compensation insurance certificate is required from this vendor (usually subcontract). If this field contains a Y and the expiration date has been reached, checks cannot be issued to this vendor

WC Expiration Date – If the WC certificate required field is "Y" this field has to contain the date on which the insurance expires.

Liability Insurance Required – A "Y" designates that a certificate of liability insurance coverage is required from this vendor (usually subcontract). If this field contains a Y and the expiration date has been reached, checks cannot be issued to this vendor

LI Expiration Date – If the liability insurance required field is "Y" this field has to contain the date the insurance expires.

Check Reference – Certain vendors require that certain information has to be on the check in order to properly post the payment. The characters in this field will be printed on the face of every check issued to this vendor. Used particularly for union payments.

Last Paid Date – Date of last check issued.

Vendor Type – Any two characters defined by each company. Labels and master lists can be printed by this type.

Intercompany – If the vendor is another company in the group, this field contains a "Y". Some reports can be run to exclude or include these vendors.

WSIB # (Canada) – For Canadian vendors that are issued a T4A, this field must contain the WSIB number

BIN # (Canada) – For Canadian vendors that are issued a T4A, this field must contain the vendor's business ID number.

Standards/Deactivate

Std G/L Expense – The account number in this field will be pulled into the AP purchases entry screen. Use this field when a vendor invoice is normally coded to the same GL number to avoid having to look up the coding.

Currency Conversion – If the vendor issues invoices in a currency other than the currency of the company issuing the check, enter the tax code (4 characters) that contains the currency conversion percentage.

Std Job – The job number in this field will be pulled into the AP purchases entry screen. Use this field when a vendor invoice is normally coded to the same job number to avoid having to look up the coding.

Std Cost Code – The cost code in this field will be pulled into the AP purchases entry screen. Use this field when a vendor invoice is normally coded to the same code to avoid having to look up the coding. However, the cost code is normally determined from the expense GL number.

Do Not Use – This field is governed by a GERULED rule (not always editable). A "Y" in this field means this vendor is not to be used. Any transactions for this vendor will be denied.
