Continue

5. Select **Invoice Type** from the drop down list provided. Your options are:

Calculation Boxes

(These boxes are present for the different invoice types. They are used to calculate the invoice amount) (Figure 3 &4)

- **Contract** – This invoice type is used for contract billing type invoices.

There are two (2) ways to calculate the invoice amount:

- a) Enter the **New Job Total** amount.
(The invoice amount will calculate based upon New Job Total).

-Or-

- b) Enter the **Invoice Amount**.

To use the **Invoice Amount** field the **New Job Total** field needs to be blank. The new job total will calculate based upon Invoice amount.

- **Service** – Use this invoice type for service billing type invoices. **Note:** You have the option to select a specific phase range on the entry screen.
- **Inspection** – Use this invoice type for inspection billing type invoices. **Note:** Only if there are existing invoices will the selection box appear. (Figure 4) **Note:** You have the option to select a specific phase range on the entry screen.
- **Retainage** - Use this Invoice type for retainage type invoices.
- **Non Job** – Select this type when you want to enter and update dollars without producing invoices.

6. Enter **Template**

-Or-

You may click on the selection icon  to select a template from a list of available templates.

**Figure 3 - Calculation Box

- Click on **Print by Cost Type** icon  to print Invoice Detail by Cost Type report.
- Click on **Print by Phase** icon  to print an Invoice Detail by Phase report.

AR Memos Tab

(Use this screen to create comments to print on invoice)
(Figure 9)

Add an entry

- You may add a sequence number. (optional)
- You may add a **Print Type**: You options are:

Top – Print memo information at the top of the invoice.

Bottom – Print memo information at the bottom of the invoice.

- Enter comments in the **Description** box.
- Click the **add**  button to add the entry.

Figure 9 - AR Invoicing – AR Memos – Add Mode

Edit an entry (Figure 10)

- Click the **edit** icon  on the line you would like to edit. The memo line will be moved into the description box.
- Make the desired changes. Click the **update**  button to update the record.

-Or-

Click the **reset**  button to clear entry without updating.

Figure 10 – AR Invoicing – AR Memos - Update Mode

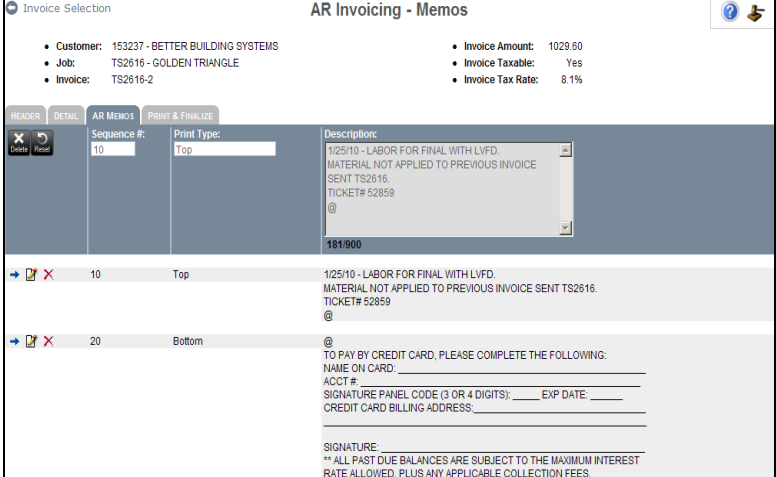

Delete an entry (Figure 11)

1. Click the **delete** icon .
2. Check the information displayed in the description box to ensure it is the correct entry to be deleted. (Figure 10)
3. If so, click the **delete** button. 

-Or-

Click the **reset**  button to clear the description box without deleting.

**Figure 11 - AR Invoicing - Memos
-Delete Mode**

Print and Finalize Tab

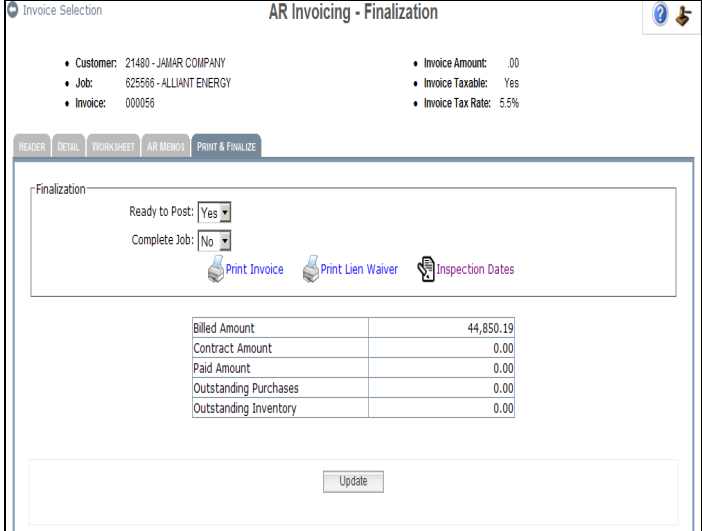

(You may print invoices, change the posting status, and/or complete the job. (Figure 12)

***Note: Once you set the *Ready to Post* flag to “Yes” if you change anything in the batch you will have to reset the *Ready to Post* flag to “Yes” again for the batch to post.**

4. Select **Ready to Post** from the drop down list provided: Your options are:
 - a. **No** - It is not ready to be posted (default)
 - b. **Yes** - It is ready to be posted
5. Select **Complete Job** from the drop down list provided. Your options are:
 - a. **No** – Do not flag job as complete
 - b. **Yes** – flag job as complete

A job cannot be completed if any open POs or inventory orders exist. Also if job costing is live on Webapps, this field is editable only for users with GERULED authorization.

**Figure 12 - AR Invoicing
– Finalization**

6. Click on **Print Invoice** icon  to print invoice(s).
7. Click on **Print Lien Waiver** icon  to print a lien waiver.
8. Click on **Inspection Dates** icon  when you finalize an inspections invoice. A new window will be displayed. You may update the last inspection date column only. **Note:** Only items related to the job being invoiced are displayed.
Click the **confirm**  button to update your change and then the **back**  **Back** icon to close the window.
9. Click on the update icon  to update and return to the AR Invoice Entry screen.

Maintain an Invoice

(View, Edit, Delete) (Figure 13)

Select the invoice type tab to be displayed. Your options are:

- **Normal** - normal invoice type
- **Retainage** - retainage type invoices.

1. If the customer/job to be maintained is not on the screen, you may enter information in the selection bar to filter your search then click .

[Click here to learn more about selection screens.](#)

When the customer/job to be viewed and/or maintained is one of the lines on the screen, click the **view** , **edit**  or **delete**  icon on that line.

View an entry

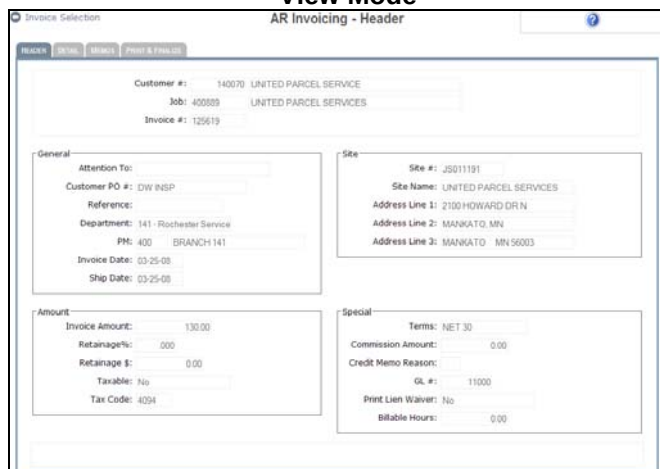

1. Click the **view**  icon.
2. View information. Click the return  **Return** icon to return to the selection. (Figure 14)

Field Definitions

AR Invoice – Add Mode

Customer # - The customer number must be 1 to 6 digits long. If you do not know the number for an existing customer, click on the search icon  to display a list of available customers. This field is automatically populated if you pick a job number.

Job - Enter the job # here, all other fields on this screen will be automatically populated except the invoice amount.

Invoice # - This is the number that identifies the invoice for the customer.

Invoice Type - Defines the type of invoice needed. Example: contract, inspection, etc.

Template - To eliminate repetitive keying, templates are created that store all the text for individual line items and memo information that prints on the invoice.

New Job Total - the total amount invoiced of the job.

Include Pending? – To include the amount from pending invoices click on the box to put a check mark in the box. Leave blank to not include

Invoice Amount - The total dollar amount for the invoice including tax and freight. It should be the amount before cash discounts are taken.

AIA Invoice – This option will create job invoices to service work files.

Header Tab

Invoice Amount - The total dollar amount for the invoice including tax and freight. It should be the amount before cash discounts are taken.

Retainage % - The system will calculate the retainage dollars for the invoice if a percent is entered here. The percent is brought from the job master if entered.

Retainage \$ - The dollar amount in this field will be subtracted from the invoice total when showing amount due.

Taxable - If the customer is tax exempt, this field contains an 'N' and the tax ID should be entered.

Tax Code - Whether or not the customer is taxable, this field should contain the tax jurisdiction where the sale takes place.

Commission Amount - The commission amount for this invoice. Only used by Twin City Garage Door.

Credit Memo Reason - For reference only, a 1 character code can be entered to represent the reason a credit memo was issued.

Print Lien Waiver - To print a special form for lien waivers, select “Yes” from the dropdown list provided. When invoices are printed the lien waiver will also print using the dollars from the invoice.

Billable Hours - To assist in tracking what has been billed for T&M jobs, this field contains the labor hours billed on this invoice.

Detail Tab

Dept # - The department number corresponding the dollar amount of the line item. The combination of department number and general ledger number must be in the chart of accounts.

GL Account - The General Ledger account number corresponding the dollar amount of the line item. The account must be a valid account for the department. This field should not be the AP liability account except in special circumstances.

Distribution Amount - The dollar amount for expensing this line item. This dollar amount will be posted to the General Ledger and Job Costing based on the information from the line item.

Job - The job number that will be expensed for the line item. The job number must exist and the GL number must allow a job number to be used.

Cost Code - The cost code is automatically assigned based on the GL number. If an entry is made in this field, it will override the system generated cost code.

Phase – For job invoices, you can enter a phase code for non-labor information.

Sales Code - If sales codes have been designated for your company, enter the appropriate three character code that represents this sale. Reports are available to print sales by sales codes if used.

Override Amount - If you do not want the program to calculate the extension (quantity * rate) then enter the override extension to print on the invoice. This dollar amount is line item total before sales tax is calculated.

NP – No Print - A check mark in this box says do not print.

NC – No Charge – A check mark in this box says there will be no charge for this line.
