

Accounts Receivable – Master Files

Customer Master

This option allows you to view/maintain information for a specific customer. You can Add, Edit, Delete, or Copy an entry. You may also view/maintain the site and job master file information for a customer.

The path from the drop down menu: AR > Master Files > Customer Master

This application contains multiple selection screens accessible by clicking on the selection icon  [Click here to learn more about selection screens](#)

If you have view authority only, the [view](#)  icon will be the only icon displayed. All screens will display in inquiry mode.

Add an entry

1. Click the [add](#)  button. (Figure 1)

Figure 1 - Customer Master
- Selection Screen

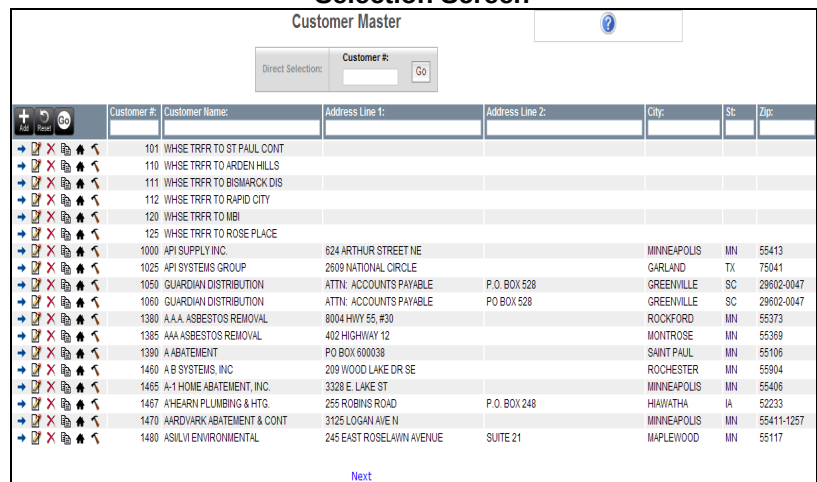

Figure 2 – Customer Master
- Add Mode

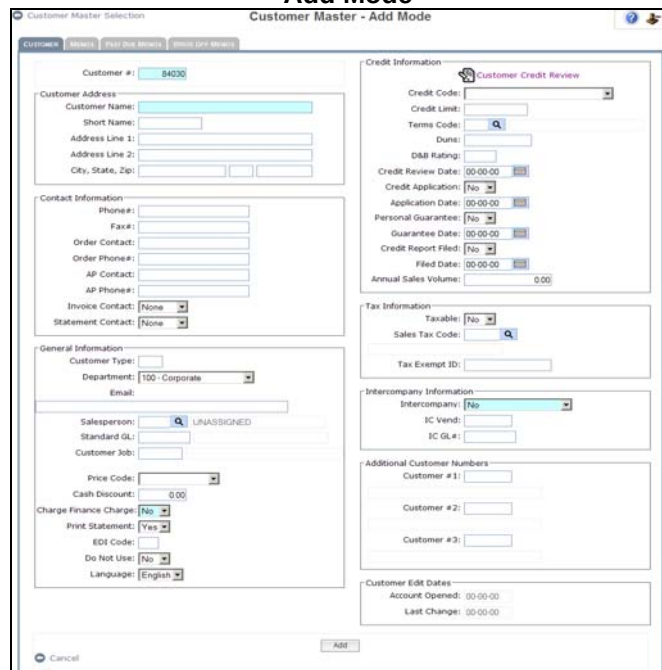

2. Enter the information. (Figure 2)

[Click here for field definitions](#)

3. Click the  button to create a new entry.

-Or-

Click the cancel icon  [cancel](#) to return to the selection screen

Maintain an entry (Figure 3)

If the customer # is known, it may be entered in the “Direct

Selection” box and click on

-Or-

The selection screen may be used to filter your search.

[Click here to learn more about selection screens.](#)

If the record to be maintained is not on the screen, you may enter information in the

selection bar to filter your search then click the

button.

When the record to be maintained is one of the lines on the screen, click the [edit](#) , [delete](#) , [copy](#)  icon on that line. *Note: See site master  and job master  documentation under the job costing menu.

**Figure 3 –Customer Master
- Selection Screen**

Customer Tab

Edit an entry

1. Click the [edit](#)  icon.
2. Make the desired changes.

Click the [Update](#) button to update the record.(Figure 4)

-Or-

Click the cancel icon  [cancel](#) to return to the selection screen.

***Note:** There is a [customer credit review](#) icon displayed on screen, click on it to review Customer Credit

Field Definitions

Contact Information

Invoice Contact – You may select 1 to use the AP contact name on the invoice or 2 to use the AR contact name on the invoice.

Statement Contact – You may select 1 to use the AP contact name on the statement or 2 to use the AR contact name on the statement.

General Information

Customer Type – Any two characters defined by each company.

_Price Code – The standard pricing given to this customer through order entry/inventory.

Cash Discount – The discount in this field will be used to calculate the allowable cash discount when material sales invoices are printed.

Charge Finance Charge – Select “No” to not calculate finance charges for this customer. “Yes” will trigger finance charges to calculate when the month end program is run.

EDI Code – This field is not used at this time.

Do Not Use – Select a "Yes" in this field if this customer is not to be used. Any transactions for this customer will be denied.

Credit Information

Credit Code – A code used to designate the customer credit status.

Credit Limit – The dollars in this field will be used to limit the balance a customer may owe at any one time. The order entry program will display a message if the credit limit is exceeded.

Terms Code – The standard payment terms for this customer.

Duns – The DUNS # associated with this customer found through a credit check. This field is for reference only.

D&B Rating – The Dun and Bradstreet 3 character credit rating code found through a credit check.

Credit Review Date – The date when the customer credit status should be reviewed. This is used for reference only.

Credit Application – Is a credit application needed, select Yes or No.

Application Date – The date credit application taken.

Personal Guarantee – Do we have a personal guarantee on file (a legal document) Select Yes or No.

Guarantee Date – The guaranteed date of personal guarantee payment.

Credit Report Filed – Is there a credit report filed. Select Yes or No.

Filed Date – The date credit report filed.

Annual Sales Volume – How much billing for this customer to see how much revenue is generated.

Tax Information

Taxable – Select from the drop down “Yes” if the customer is taxable, “No” if the customer is tax exempt.

Sales Tax Code – This field should contain the tax jurisdiction where the sale takes place, regardless of whether the customer is taxable or not.

Tax Exempt ID – If the customer is tax exempt, be sure to record the tax ID number here.

Intercompany Information

Intercompany – If the customer is another company in the group, this field contains a "Y". Some reports can be run to exclude or include these customers. If a customer has been set up for internal transfers (between branches), enter a 'T'.

IC Vend – If this customer has intercompany transactions, this field contains the vendor number to use for posting to the company that is sold to. The vendor number is the one on the buying company's AP listing.

IC GL# – If this customer has intercompany transactions, this field will contain the GL account number used for posting to the company that is sold to when the AP transaction is created on the buying company's books.

Additional Customer Information

Additional Customer Numbers – If the customer is related to other customers in the system, the field(s) will contain the customer number of one of the related records.
